

Bird Call Kit BCK-1

Thank you for purchasing our product. To ensure safe assembly and use, please read this instruction manual carefully before use. Keep this manual in a safe place for future reference.

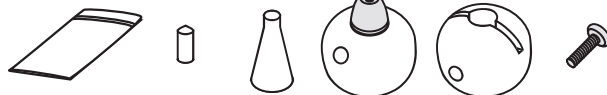

Please read carefully before assembly

- ⚠ This kit requires some parts to be glued. Once glued, the parts cannot be separated. Please refer to the "Assembly Instructions" and assemble the kit correctly.
- ⚠ Handle carefully to avoid injury from sharp edges.
- ⚠ Do not throw or handle parts roughly. Improper handling may result in injury or damage.
- ⚠ Keep this product out of the reach of small children.
- ⚠ Avoid using or storing in areas with high moisture, high humidity, or extreme temperatures. Doing so may cause deformation or damage.

[Please check that all parts are included]

- ① Rosin ② Beak ③ Tail ④ Head ⑤ Body ⑥ Screw

- Estimated Assembly Time: About 15 minutes (excluding painting time)
- Appropriate Age Range: 5 years and up
- Required Tools: Painting supplies (colored pencils, acrylic paints, etc.), #2 head-sized Phillips head screwdriver, wood glue

[How to Play]

Try calling wild birds with a sound like a bird's chirping.

Making the sound is easy: Hold the head and body, press them together, and twist. By adjusting the pressure and speed, you can create various bird calls, so feel free to experiment.

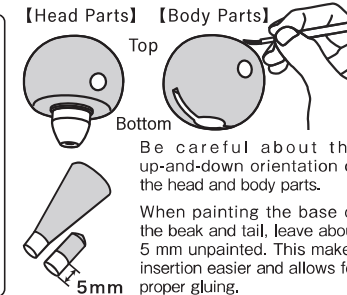

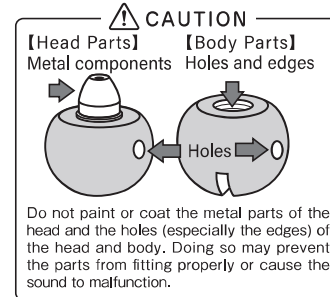

Tips!

After long-term use, the parts may slip, making it difficult to produce sound. In that case, apply the included rosin to the friction surfaces to restore the original sound.

[Assembly Instructions]

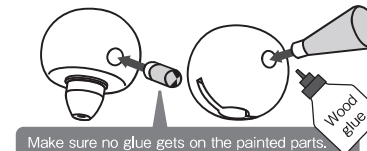

※ Keep small parts in an empty box or container while working to avoid losing them.

- ① Paint the parts before assembly. Once completely dry, coat with clear varnish or wood finish will give more polished results.

- ② Use wood glue to attach the beak to the head and the tail to the body.

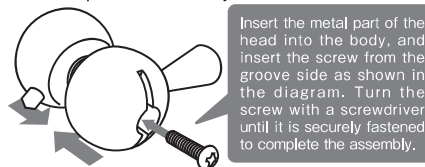

※ Before gluing, make sure you correctly identify the head and body parts.

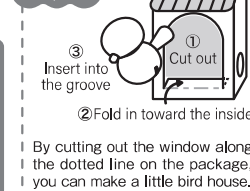

- ③ Apply rosin to the metal part of the head.

- ④ Attach the head and body using the screw with a #2 head-sized Phillips head screwdriver to complete the assembly.

Tips!
